# PRESS RELEASE

## Ice Nine Group Announces Two Camaro Packages *Cool # 9 Street and Circuit Editions for Fifth Generation Camaros.*

**Detroit, April, 2011:** Ice Nine Group Inc, an automotive design and builder of limited edition and low volume production vehicles is proud to announce the launch of two limited edition packages for the fifth generation Camaro.

**Cool #9 Street Edition** offers improved handling utilizing proven Eibach suspension components. Springs and sway bars to give a proper muscle car stance and improved cornering. A fifty state legal exhaust system provides a true muscle car note. For manual transmission equipped cars a Hurst short throw shifter with a color matched shift ball is installed to quicken shifts and add a touch of retro muscle car to the interior.

Custom SS inspired stripes are painted and color matched interior door, dash and console pieces are included. A GMP grill, lip spoiler and rocker panels are painted body color. A custom rear valance and rear diffuser is added for a more aggressive look.

[MORE](#)

**Circuit Edition** offers all of the improvements included with Cool #9 but takes it another level by adding a fully adjustable coil over package, carbon fiber hood, lip spoiler and truck lid and a carbon fiber di-noc wrapped roof. An adjustable touring car inspired rear wing is added to increase rear down force. Supercharged versions and lightweight wheel packages are available.

Unique to the Circuit Edition is that each version is inspired by famous road course race tracks from around the world with the first run being a Laguna Seca Edition. Each car will be painted a specially formulated "Laguna Seca Blue Pearl". Numbered dash plaques and badging will be included.

Pricing for both packages and images of Circuit Edition to follow.
