# PRESS RELEASE

Ice Nine Group Announces Dodge Challenger Wide Body  
*Icon9 Wide Body Challengers to be offered by Ice Nine Group.*

**Detroit, April, 2011:** Ice Nine Group Inc, an automotive design and builder of limited edition and low volume production vehicles is proud to announce Icon9 Wide body Dodge Challengers will be built at their Clinton Twp, Mi based headquarters.

Icon9 Wide Body Challengers blend the heritage of the Trans Am era road race cars with today's modern muscle and function ability.

Innovative Composite Flared Front Fenders, Three-Dimensional "Billboard" Quarter Panel Extensions, and Aerodynamic Front Canards add the perfect balance of styling and functionality.

By adding six inches to the width of the Challenger, the Icon9 Wide Body package can easily accommodate an 11.5" width rim in the rear and a 10" width rim up front. The Icon9 package can handle anything up to a 315-series tire. The re-arched wheel wells visibly lower the vehicle while retaining adequate ride height so you don't have to sacrifice ride quality and handling.

[MORE](#)

Each Ice Nine Group built car will offer a custom developed Billboard accent color, graphic package and badging to ensure that each car is unique to the owner. Look for the wide body Challenger in the upcoming Fast 5 starring Vin Diesel.

**Icon9 Challenger Package Includes:**

- Left and Right Composite Wide Front Fenders
- Left and Right Composite "Billboard" Wide Rear Quarter Panel Extensions
- Left and Right Front Spoiler Canards
- Left and Right Front and Rear Fenderwell Extensions
- 20X10" Front + 20X11.5" Rear 3-Piece USW Forged "Crossover" Wheels
- Z-Rated Pirelli P-Zero Rosso Tires, 315/35 rear + 275/40 front
- Unique badging and accent colors

Other options include a functional Shaker Hood and soon a Supercharged version for the 5.7, 6.1 and 6.4 Hemi.

Pricing to follow.
